

ECOMMERCE SHOPPING CART PLUGINS

GetePay Magento plugin v2.0.2 for Magento v2.4.6

Thank you for downloading the GetePay plugin for Magento.
Along with this integration guide, your download should also have included your plugin in a .zip (or compressed) format. In order to install it, kindly follow the steps and instructions outlined below, and feel free to contact the GetePay support team at support@getepay.in should you require any assistance.

INSTALLATION INSTRUCTIONS

STEP 1

Extract the contents of the above mentioned .zip file to your preferred location on your computer. That can be done using unzipping applications such as WinZip and many others, but for a complete list of suitable applications and programs, simply search the Internet for an "unzipping application". This process should create a number of files and folders at the location you chose to extract them to.

STEP 2

You can either install this module using composer:
- **composer require getepay/getepe**

Or you can upload the GetePay folder into your Magento code directory:
- **magentorootfolder/app/code/**

STEP 3

Run below commands to install the GatePay plugin where <Magento file system owner> is the primary web server user. Ask your web hosting provider if you are unsure.

- **sudo -u <Magento file system owner> php bin/magento module:enable Getepay_Getepe**
- **sudo -u <Magento file system owner> php bin/magento setup:di:compile**
- **sudo -u <Magento file system owner> php bin/magento setup:upgrade**
- **sudo -u <Magento file system owner> php bin/magento setup:static-content:deploy -f**
- **sudo -u <Magento file system owner> php bin/magento indexer:reindex**
- **sudo -u <Magento file system owner> php bin/magento cache:clean**

STEP 4

Log into the admin panel and navigate to **Stores > Configuration > Sales > Payment Methods** and click on **Getepay Payment Gateway**. When done with configuring the module, click on the **Save Config** button and after that clean Magento Cache navigate to **System> Cache Management**, click on the **Flush Cache Storage** and **Flush Magento Cache** button.

GETEPAY WILL NOW BE AVAILABLE AS A PAYMENT METHOD ON THE CHECKOUT PAGE.
